

SAY NO TO FRACKING IN GEELONG

Fracking is a technique where rock is fractured by injecting a highly pressurized liquid to mine natural gas. Chemicals and sand suspended in water are injected into a well to create cracks in the deep-rock through which natural gas will flow more freely.

Fracking can pollute underground water from leakages, air with silica sand dust, create 24/7 noise and reduce the value of our homes. We are sitting over a large rich gas field and PEP 163 (see map below) is an exploration license where fracking may be allowed when/if the moratorium on fracking in Victoria is lifted by the State Government next year. But we can prevent fracking here.

The Geelong City Council is taking submissions to find the community's views on fracking.

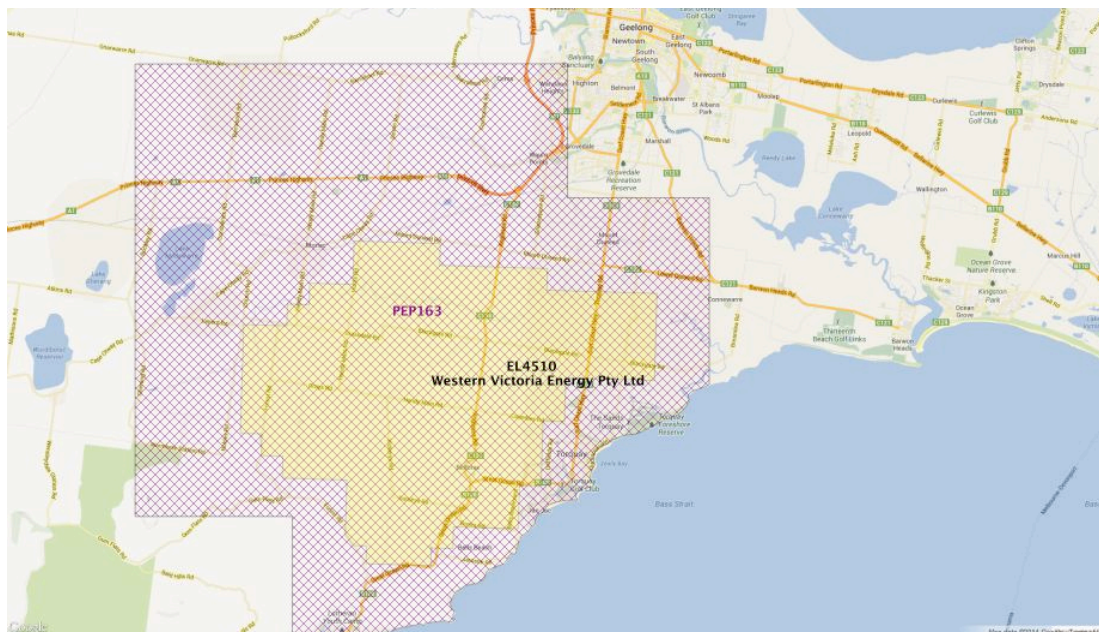

Write a letter (short or long) and post to: Onshore Gas Submission, Manager Environment and Waste Services, City of Greater Geelong, PO Box 104, GEELONG 3220 – or **email a few lines** to rthomas@geelongcity.vic.gov.au – or **drop a note in designated boxes** at customer service centres. Remember to include your name and address.

You can also **do it online** at www.geelongaustralia.com.au/yoursay – You can simply say you are opposed to fracking in our area. Or find inspiration on www.frackfreegeelong.org/yoursay

Every submission counts. Closing date for submissions is Friday **26 September 2014**.

For more information go to www.frackfreegeelong.org
